PROTECT YOUR CORN CROP *with* Semesan Jr.

1½ oz. will treat 1 bushel of seed.

Semesan Jr. dry treatment of hybrid Sweet Corn helps to reduce the loss of seed through rotting, which is caused by the harmful fungi such as Diplodia and Gibberella, which are often present in the soil. Besides preventing missing hills due to this cause, it also improves stands and sturdiness of the corn seedlings and generally increases the yield. It is safe and easy to apply, and the cost per acre is negligible.

Henderson's Famous New York and Imperial Types

NEW YORK (HENDERSONS')

We introduced this noted variety many years ago. It has been extensively grown in all sections of the country, and although not as popular today since the introduction of the earlier New York types, is still used in large quantities in many localities. The plants are large, with dark green outer leaves, which are slightly curled on the edges. The heads are large, very solid, well blanched, crisp, sweet, and are slow to run to seed. Our strain is noted for its uniformity and large sized heads.

	oz.	¼ lb.	lb.	10 lbs.
Price	35c	$1.00	$3.00	$29.50

NEW YORK NO. 12

This is an earlier selection from Henderson's New York. It is very sure heading and better adapted to warm weather than the original type. The plants are compact with few outer leaves, and head with great uniformity. The heads are slightly flattened, solid, and of a large even size. The most dependable of the New York types, especially under varied growing conditions.

	oz.	¼ lb.	lb.	10 lbs.
Price	35c	$1.00	$3.00	$29.50

NEW YORK NO. 515

An early type of New York which in appearance resembles New York No. 12, but is a few days earlier and brighter green in color. The heads are well formed, solid and very attractive. It is also dependable in heading and well adapted to a wide range of soil and growing conditions. Highly recommended.

Price	35c	$1.00	$3.00	$29.50

IMPERIAL NO. 44

This new Iceberg type was developed by Dr. I. C. Jagger of the U. S. Department of Agriculture. During 1936 and 1937 test plantings of Imperial No. 44 were made in various lettuce growing muck districts of the East. The variety looked so promising in these tests, that lettuce growers throughout the muck sections are very enthusiastic about the possibilities of this new variety. Although not extensively tried on upland soils, we believe it will be suitable there as well. Imperial No. 44 produces large, hard, well formed heads, uniform in size. In comparative test plantings, it has produced a good percentage of hard heads when nearby plantings of commercial strains proved worthless.

	oz.	¼ lb.	lb.	10 lbs.
Price	35c	$1.00	$3.00	$29.50

IMPERIAL NO. 847

This new black seeded New York type has proven very satisfactory in many sections of the East. It is particularly well suited to upland soil. We have seen several commercial plantings that were so even in maturity that the entire crop was ready for cutting at one time. Plants medium large, with bright green leaves. Heads round, large, solid, crisp and of good quality.

Sow The "Henderson" Lawn Grass Seed

and Obtain a Grassy Carpet of Unrivalled Emerald Green
IN FOUR WEEKS FROM SOWING IT IS READY FOR MOWING

Henderson's celebrated Lawn Grass Seed Mixture has been thoroughly tested by a country-wide use during three-quarters of a century. It is the fruit of years of our personal experience and study, coupled with that of many of America's foremost gardeners, who steadfastly maintain and unite with us in saying that it has no superior for American conditions and the American climate. The rapidity with which it will form a deep green velvety turf, has been the delight of gardeners since its introduction, for, under ordinary conditions, the bare soil will be clothed with an emerald carpet of living green in four weeks' time.

	lb.	5 lbs.	10 lbs.	25 lbs.	100 lbs.
Price	45c	$2.10	$4.00	$10.00	$37.50

STANDARD LAWN SEED

This is a blend that is far superior to the low priced lawn seed usually offered. It should be of special interest to florists and contractors for use on development projects. Although this seed is not recommended for a permanent lawn, like the Henderson blend, it does not, on the contrary, give a flash-in-the-pan, but produces a fine durable turf. Sow at the rate of 1 pound to 200 square feet.

Price	30c	$3.00	$7.00	$25.00

SHADY NOOK

The Ideal Mixture for Shaded Areas

On nearly all lawns there are unsightly bare spots under the shade of trees, which have baffled all efforts to get into Grass, but with this mixture there need be no further difficulty. It is a combination of fine, dwarf growing, evergreen varieties, which in their wild or natural state are to be found growing in the woods or other sheltered and shaded spots. Ground that has been densely shaded by trees is frequently "sour," and if the drainage is defective it is apt to be covered with moss and coarse Grasses. In such cases an application of slaked lime, at the rate of one hundred pounds to each thousand square feet, or two tons to the acre, is an excellent corrective and sweetener, but the moss should be first raked off.

	lb.	5 lbs.	10 lbs.	25 lbs.	100 lbs.
Price	60c	$2.75	$5.25	$13.00	$50.00

SPECIAL "BENT FORMULA"

A combination of the finest recleaned Grasses, using as a basis for this mixture the imported and domestic Bent Grasses which are so largely used in the finer Putting Greens of today.

A lawn seeded with this mixture and properly cared for will in truth make every lawn a Putting Green. On a lawn of this type, Clock Golf and other lawn games may be enjoyably played.

It is imperative in maintaining a lawn of this type, that the grass should be kept cut short and well rolled all through the season. Starvation of the grass plants is most frequent cause of unsatisfactory lawns, and grass needs constant small applications of fertilizer and plenty of water to maintain a perfect lawn.

	lb.	5 lbs.	10 lbs.	25 lbs.	100 lbs.
Price	80c	$3.75	$7.50	$17.00	$60.00

TOUGH TURF

The turf required for outdoor sports must be closely interwoven, firm, elastic, smooth, and durable to stand the wear and tear. These requirements are met in this mixture, which is composed of fibrous, deep-rooting Grasses that spread and intermingle. The seeds are blended in the proper proportions to form and maintain a tough matted sward, constantly green, even in dry weather.

	lb.	5 lbs.	10 lbs.	25 lbs.	100 lbs.
Price	45c	$2.10	$4.00	$10.00	$37.50

TERRACE SOD

This is a special mixture of Grasses best suited for sowing on terraces, embankments and hillsides; Grasses that produce long, strong, spreading roots, thus preventing heavy rains from washing them out; that will withstand drought, thrive on shallow soils, and at the same time produce a rich, velvety-green turf throughout the season.

	lb.	5 lbs.	10 lbs.	25 lbs.	100 lbs.
Price	60c	$2.75	$5.25	$13.00	$50.00

SEASIDE

Our "Seaside" mixture will make a good turf of green on sand where the finer Grasses will not thrive, of course, the sand must be top-dressed with not less than 2 inches of soil before even our "Seaside" Grass Seed is sown, to enable the young Grass to get a start, after which the long roots—peculiar to the varieties we used in this mixture—drive down deeply in the sand and remain permanently self-sustaining, if attention is given to sprinkling during dry weather.
